POSTDOCTORAL POSITION

Job Description: A Postdoctoral position is available for a highly motivated individual to study pharmacogenetics of human reductases with emphasis in anticancer drug metabolism, transcriptional regulation and protein function. Position requires a Ph.D. with strong background in molecular biology, biochemistry and pharmacology. Candidates must have demonstrated experience in molecular and biochemical techniques such as gene cloning, gene expression, mutagenesis, protein expression, gel shift assays, DNA/RNA purification, PCR, and bioinformatics. Ability to work with different types of human tissue samples is desirable. Publications in international journals are a prerequisite. Successful applicants are expected to have the ability to work independently. Strong verbal and written communication skills are required. Starting salary will be commensurate with experience.

Applicants should send a letter of application, *curriculum vitae*, and the names of two references to: Dr. Javier G. Blanco, Department of Pharmaceutical Sciences, University at Buffalo, 545 Cooke Hall, Buffalo, NY 14260-1200; e-mail: jgblanco@buffalo.edu. Phone: 716-645-2842 ext 545. Information about the School of Pharmacy: <http://pharmacy.buffalo.edu/>.
